

## KEIM ALGICID

---

### 1. Product Information

Keim Algicide is a non-acid fungicide wash to destroy algae and micro-organism on all mineral surfaces.

### 2. Field Of Application

Keim Algicide is suitable for all mineral surfaces which are being attacked by micro-organisms. Surfaces to be treated 2 hours prior to cleaning, as a preventive protection against attacks of micro-organism.

### 3. Product Characteristics

- Easy to apply
- Non flammable
- Prevents mould/fungal growth

### Material Data:

Density Q= 1.0 g/cm<sup>3</sup>

### 4. Application

#### Substrate Preparation:

Any algae should be wire brushed to remove all growths and then treated with Keim Algicide, brush or spray applied undiluted and allowed to remain undisturbed for some 3 hours before thoroughly washing off. Where algae growth is severe a further treatment of Keim Algicide should be applied as detailed and allowed to remain and dry on the surface.

### Consumption:

Approx. 0.2 lt/m<sup>2</sup> per application.

Consumption rates are offered for guideline purposes only and are quoted for smooth rendered surfaces. Actual rates are the responsibility of the applicator. Project specifications should be referred to for specific rates.

### Tools:

Clean immediately after use with water.

### 5. Packaging

5 & 20 lt containers

### 6. Storage

Approx. 12 months, if kept cool but frost free in tightly closed containers.

### 7. Identification Ref. Ordinance Of Dangerous Material

Not applicable

### 8. Danger Class In Goods traffic

Not applicable

### 9. Safety Instructions

Cover surfaces which are not to be treated, in particular plants, etc. Protect the eyes and skin from splashes. Keep out of reach of children.
